Solar Inverter Warranty. Most solar PV inverters come standard with 12 year warranties. Almost all companies will allow customers to upgrade their warranties from 12 to 25 years for a very nominal rate, around \$300 - \$400. Power Optimizer / Micro Inverter Warranties.

Note: If an inverter connected to Solax cloud and generation data been successfully uploaded to Solax server, the inverter warranty will be freely upgraded to 5 years standard warranty + 5 years parts warranty; X3-MEGA-G2; X3-Forth; 5 years standard warranty, starting from the earlier one of following two dates:

The typical solar power warranty covers most parts of the system, including inverters, racking, and other equipment: Most solar energy inverters have a 10- to 25-year warranty. Racking often comes with a 10- to 20-year warranty on material defects.

The length of a solar panel warranty varies depending on the manufacturer, but a 10-year product warranty and a 25-year performance warranty are considered a bare minimum in the solar industry.

# Solar inverter warranty

Inverter warranties vary by manufacturer and type of inverter. A standard inverter warranty should come with at least 10 years of protection. Typically, inverter warranties won't reimburse any labor costs associated with installing new equipment, but many popular inverter companies cover shipping fees for new equipment

A solar inverter warranty is an assurance provided by the solar panel manufacturer or installer to assure protection for panel reliability, production output, and several other factors. It is important to select the best warranty for solar panel inverters for the following reasons:

So, you want to ensure that your inverter has a comprehensive warranty if anything goes wrong. MLPEs like microinverters or power optimizers often come with a 25-year warranty, like the solar panels they live behind. On the other hand, most string inverters come with a warranty of around 10 years.
