Cleaning Solar Panels. We are often asked if it is worth cleaning solar panels on a regular basis, in most cases the answer is NO. Most solar arrays installed on a pitched roof (more than 10 degrees) are self cleaning during rain periods, if your roof has a pitch of less than 10 degrees or you live in a particularly dusty area your panels may require periodic cleaning.

Protect your solar panels with solar panel cleaning in Sunshine Coast. If you've invested in solar panels for your home or business, you're probably enjoying the benefits of clean, renewable energy and lower electricity bills.

At Shining solar we can regain your solar efficiency by up to 30% by having your panels cleaned from baked on dust, dirt, pollution, sea salt, bird/bat dropping, moss, mildew and lichen. If the bottom frame of your panels are dirty, so are your panels! Lost production means lost money.

When it comes to solar panel cleaning, many people aren't sure how to or how often. Normally the average bit of dust is washed away naturally by the rain. However, solar panels are exposed to harsh weather conditions and obscuring objects such as leaves, ash or bird droppings so cleaning and maintaining your system will help you make the most out of your investment.
