There are three major differences between buying and leasing solar panels: If you purchase a solar system, either with cash or a loan, you own the system and receive 100% of the benefits that come with it. That includes the 30% federal solar tax credit and any other state, local, or installer incentives.

No worries about repairs or maintenance: The solar lease company is responsible for repairing the panels and performing solar maintenance on the panels. Predictable payments: You know exactly what you'll pay each month; it's specified in the lease contract.

Solar panel leasing companies

The steep up-front costs for a residential solar system can make a leasing company's sales pitch sound pretty appealing: Pay little or nothing and save hundreds of dollars per year on average. (The premise is that you save because the combination of your lease payment and your electric bill is less than what you currently pay for power.)

4 days ago; Unfortunately, selecting a solar lease disqualifies you from money-saving incentives, since the solar company legally owns the system. This payment option offers little financial benefit to homeowners since the rented system doesn't increase your home value. You'll also need good credit to qualify for a solar leasing program.

Solar leases come with instant savings, but the lifetime savings of owning solar panels is much greater. And that's not the only drawback of leasing solar panels. Drawbacks of solar leases. Solar leasing companies claim 30% federal solar tax credit and any other incentives instead of ...

Our solar farms have similar characteristics to a field of corn in that it is only 4 to 10 feet high, with 10 feet being the peak height as the panels rotate during the day to follow the sun. Solar farms are enclosed by fencing and landscaping to minimize visual impacts and often add hundreds of trees to the neighborhood.
