

Solar panel system for camper van

How to install solar panels on a campervan. You can choose from fixed or folded solar panels to use on a campervan. Folding solar panels are very simple and versatile, which are ideal for those who do not want to commit to using a solar panel. Fixed ones, on the other hand, are more permanent.

Any wires that pass through the motorhome's roof must go via a cable gland box, which has waterproof rubber seals, and any cables passing through any panels must be protected by rubber grommets and sealant. If you're using more than one solar panel, it's most efficient to wire them in series.

Mounting solar panels on a camper van roof can feel like the most daunting process of a van conversion build, mainly because it involves drilling through the van's roof. But if you follow this step-by-step guide and are careful throughout the process, we're confident you can install your panels without incident.
