Lazer Solar Attic Fans are manufactured using high-impact photovoltaic solar panels to power the fan for free all during the day. The units are fully operation right out of

Solar photovoltaic attic fan

Natural Light Solar Attic Vents/Fan Commercial Curb Mounted 16 Watt & 32 Watt Models . Attic venting is an important aspect in maintaining the functions in your home. Proper venting cools off your roof extending the material life and reduces the load on your air conditioning system.

Solar-powered attic fans. Photovoltaic (PV) panels power these types of attic fans. "The solar-powered fan is generally mounted on the outside of the roof," says Houghton. "It is used to circulate warm air from inside the home out through vents in the eaves or roof." Some fans feature an optional solar-powered blower.

The Solar Star Roof Mount 2400 - 35 Watt Attic Fan generates maximum power to battle built-up heat and moisture in your attic. It's the ideal solar-powered ventilation solution for large attic ...

Natural Light Solar Attic Fans are so energy efficient that they qualify for Federal Solar Tax Credits as defined in the Emergency Stabilization Act as a residential photovoltaic system. The energy-efficient components built into solar attic fans mean those who have them installed automatically qualify for a federal tax credit.

* Miami-Dade County has the strictest test protocols in the country for wind-borne debris, air and water tests. The Miami-Dade County Notice of Acceptance (NOA) for impact-resistant products is the best way to be sure that a attic fan has been tested and meets all the requirements for hurricane protection in the High Velocity Hurricane Zone (Miami-Dade and Broward Counties).

Normally, your Remington Solar attic fan runs directly off the solar panel. When the sun goes down, your fan would stop. With the Hybrid Power Adapter, if your attic is above 80 degrees Fahrenheit after dark, then the "smart sensor" will draw from your house power and keep the fan running until the attic cools down. See more

If you're asking yourself, "Are solar powered attic fans worth it?" it's likely because you've experienced that unbearable summer heat, especially in Texas, where the average summer temperature is 85.3°F and daily highs hit 98.3°F. This kind of heat can turn your home into an oven and push your air conditioner to work overtime, which ultimately raises your ...
