Solar pool pump systems

The SolarTouch Solar Control System offers full digital control for the most precise, efficient, swimming pool heating possible. The digital thermostat is set with the touch of a button and will monitor the temperature of the pool water and solar collectors. SolarTouch Control System integrates with IntelliFlo and IntelliPro Variable Speed pumps for unparalleled efficiency.

If you already own a traditional pool pump and are looking to transition to solar power, a solar-powered pool pump conversion kit might be just the ticket. It's a practical and cost-effective way to upgrade to solar, reducing your energy consumption and contributing to a cleaner, greener environment.

During this 12-hour period, this energy is sent from the PV panels through the DC disconnect to the SunRay Solar Pump. This SunRay pump processes the FREE solar energy to filter your pool. Our SunRay DC pumps are truly variable speed by the sun and works naturally in the same way the other variable speed pump work.
