Indigo Power: NSW: Residential: 6.0: 6.0: 600: Pacific Blue: NSW: Residential: 0.0: 0.0: 0: Alinta Energy: NSW: Residential: 6.7: 6.7: 670: PV system is limited to 5kW inverter capacity.

4 days ago; However, a higher solar feed-in tariff (FiT) won't necessarily translate to lower power bills. For example, an electricity retailer might offer a high solar feed-in tariff (FiT), but may also have a higher than usual usage and supply rates. This would mean that any savings from the solar feed-in tariff (FiT) are lost by paying more for ...

In December, the New South Wales (NSW) Solar Bonus Scheme came to an end, marking the first significant change to Australia's solar feed-in tariffs since they were established to encourage the adoption of solar power systems. When the scheme ends, those in NSW could see their solar buyback (a fixed rate per kilowatt hour) potentially replaced with rates up to 80 per cent lower.

Our benchmark ranges can help you understand if your electricity retailer is offering a reasonable solar feed-in tariff. Each year, IPART sets 2 solar feed-in tariff benchmark ranges. These are: An all-day solar feed-in tariff benchmark range - this is a flat-rate solar feed-in tariff that applies across the whole day; A time-of-day solar ...

Solar Feed In Tariff Summary Table - New South Wales 2000 Here's a quick summary of the applicable solar feed in tariffs for each Dodo plan in your postcode (on the Ausgrid network). For the full details, check out the individual plan information below.

Earn more from your solar power with Origin's great feed-in tariff rates in ACT, NSW, QLD, SA and VIC. All our solar plans come with a feed-in tariff. You'll be eligible for either our standard retailer FIT or a boosted one. What is a solar feed-in tariff?

Our Fact Sheet on the all-day solar feed-in tariff benchmark range discusses our benchmark for 2024-25, how this has changed from the benchmark for 2023-24 and helps consumers understand the main benefits of solar panels. We also discuss why our solar feed-in tariff benchmark range is lower than the price of electricity that your retailer charges.

There are two main types of feed-in tariffs available for NSW residents, namely: net feed-in tariffs and gross feed-in tariffs. Net feed-in tariff - A net feed-in tariff refers to the payment you get for the surplus energy you send back to the grid from your PV system. You will be paid for the units in Kwh you "donate" back to the grid.

Get your solar system from us and receive our highest feed-in tariff. Our Solar Boost Plus offer is available when you purchase an Origin solar system and request a quote. You'll get our highest (best) feed-in tariff for any solar energy you export back to the grid. Add a battery storage to the mix. Sometimes you'll get the best of both worlds!

How does the tariff work? If the retailer fully passed through our two-way tariff, a typical 5 kW solar customer will see an annual bill increase of \$6.60 per year. This includes \$13.30 a year of charges offset by \$6.70 of export rebate. The tariff includes a free threshold. The amount you can export to the network for free depends on which ...
