

Solar power light outdoor

Most light manufacturers will mention the maximum brightness of a light in lumens. It helps gauge the brightness of a light, and the higher you go in lumens, the brighter a light will be. Color temperature, weather protection, and light coverage angle are other vital features you should consider while selecting an outdoor solar light.

Almost all solar-powered outdoor lights are LEDs, with either integrated or replaceable bulbs. Because they are designed for outdoor use, most solar-powered lights offer decent water and weather resistance. The level of resistance varies from light to light; pay close attention to each model's weather resistance rating.
