Despite the variable climate, Northern Ireland, Ireland, and the UK are suitable for solar energy generation. Modern solar panels are highly efficient and can generate electricity even on cloudy days. TRE Energy's systems optimise energy production under local weather conditions, providing reliable and sustainable power year-round.

A solar inverter works by taking in the variable direct current, or "DC" output, from your solar panels and transforming it into alternating 120V/240V current, or "AC" output. The appliances in your home run on AC, not DC, which is why the solar inverter must change the DC output that is collected by your solar panels.

Similarly, different types of solar panels in Ireland, such as: Monocrystalline Solar Panels: These panels are made from a single crystal structure and are known for their high efficiency and sleek appearance.
