Grid-connected residential solar panels Sydney, NSW is the most common type of residential solar power installation in Australia. The inverter converts DC electricity generated by these installations - which originate from photovoltaic panels - into AC current so it can be used around your home or business.

In the event of a grid outage, your solar system switches to backup mode, using stored energy from your battery to keep essential appliances and systems running. Whether it's lights, refrigeration, or communication devices, your home stays powered and secure, giving you peace of mind during unexpected power failures.

We recommend 6.6kW solar systems for medium-sized households of up to 5 occupants, with energy needs of 10 to 15 kW a day. 6kw, 6.6kW or 6.66kW solar systems are excellent configurations for Australian households and can produce sufficient power to reduce your electricity bills. A 6.6kW solar power system is very convenient to connect to the grid.
