

The moon map

Looking to get started learning the features of our natural satellite, the Moon? This page has various maps of the full Moon detailing how to identify major features - maria, mountain ranges and larger craters/basins. Perfect for beginners with telescopes!

Moon 3D Map allows you to view Moon landscape in a new way. The Moon is in synchronous rotation with Earth, always showing the same face with its near side marked by dark volcanic maria that fill between the bright ancient crustal highlands and the prominent impact craters.

Click here to download your map of the Moon. (The PDF requires free Adobe Reader software to open, view, and print. Get Adobe Reader here.) Meanwhile, your first edition of Sky & Telescope's weekly newsletter will arrive in your inbox next Friday.

Moon Trek Trek is a NASA web-based portal for exploration of Moon. This portal showcases data collected by NASA at various landing sites and features an easy-to-use browsing tool that provides layering and viewing of high resolution data.

The lunar map, called the "Unified Geologic Map of the Moon," will serve as the definitive blueprint of the moon's surface geology for future human missions and will be invaluable for the international scientific community, educators and the public-at-large.

Moon Map. Activities. Multimedia. Viewing Guide. Photography Guide. This map depicts the Moon as it appeared on International Observe the Moon Night, September 14, 2024, at 8:00 PM EDT (00:00 UTC September 15). At this phase, many of the best views occur along the terminator (the line between the day and night side of the Moon) where shadows ...
