

Uniper Energy Storage's storage facilities almost 100% full. 25 Nov 2022 Funding decision for hydrogen pilot project in Krummhoern natural gas storage facility received. 25 Jul 2022 Pagination. Show more; Media contact at Uniper Energy Storage. Dr. Adrian Schaffranietz.

Work on the daily energy supply and support us in driving the energy transformation of tomorrow! We are an international energy company with headquarters in Düsseldorf, Germany. With about 7,000 employees generate, trade and market energy. We intend for our entire business to be carbon-neutral by 2040. And this is where we need your ideas!

Uniper Energy Storage GmbH pools together decades of experience and all of the Uniper Group's competence in underground storage of natural gas. We regularly review our comprehensive product portfolio to reflect the needs of our customers in a changing market, so that we can pass on the technical and commercial innovations we are continually ...

In the UK, Uniper owns and operates a flexible generation portfolio of seven power stations, a fast-cycle gas storage facility and two high pressure gas pipelines, from Theddlethorpe to Killingholme and from Blyborough to Cottam. We also have significant long-term regasification capacity at the Grain LNG terminal in Kent, to convert LNG back to ...

The Holford flexible natural gas storage facility is located 30km southwest of Manchester, United Kingdom and can be used to balance short-term fluctuations in demand. More about Holford Killingholme

4 days ago; Start your career as a Uniper trainee and become part of our Uniper trainee program. As a trainee, you have the opportunity to get to know different areas of the company and gain valuable experience. The program, with a combination of predefined and flexible stations, includes the opportunity to gain international experience and work in ...

Underground natural gas storage and innovative storage solutions - The gas storage facilities also play an important role in maintaining stability in the gas networks in order to be able to compensate for consumption peaks in winter safely at short notice.

The storage of hydrogen in salt caverns has so far only been used sporadically in the USA and the UK. Especially for operational use with cyclical injection and withdrawal, there is not enough experience in Germany. ... On behalf of Uniper Energy Storage, Frank Holschumacher (authorized officer/Vice President Operational Performance Storages ...

The updated (May 2024) Hydrogen Infrastructure Map is now available online show mapping how the European infrastructure evolves across countries and sectors for hydrogen distribution, transmission, import terminals, storage, demand and production towards 2030, 2040 and 2050. Our H2 Storage projects

"HyStorage" and "H2 Krummhörn" are part of more than 70 (!) ...

All of the businesses in Uniper's portfolio have two main missions: ensure supply security and accelerate the energy transition. We generate power across Europe and trade energy worldwide. We also sell bulk electricity, gas, and heat to industrial enterprises and utilities.

Uniper Energy Storage will develop salt caverns for the underground storage of hydrogen with a planned working capacity of 250 to 600 GWh by 2030 Investigation of existing and new sites along the hydrogen core network in Lower Saxony and North Rhine-Westphalia Krummhörn storage site to be expanded in future Market consultation to be conducted in F...

Uniper Energy Storage intends to develop salt caverns for the large-volume storage of hydrogen in north-west Germany. The initially envisaged storage capacity will be 250 to 600 GWh, which should be available to the market before the end of 2030.
