In this guest blog Pierre-Paul Bermingham explains how Victron Energy's Pay As You Go (PAYG) solar power systems are allowing lower income customers to take advantage of high quality products, whilst at the same time improving energy provision and local employment. Here are 3 examples of the kind of systems offered for the PAYG market [...]

Hi Are you still looking to resolve how to integrate Wind generation into a Victron system? I could give you a few pointers. I run a Victron setup with a non Victron Windturbine MPPT controller (And I can explain why) I can still monitor production and status from Victron Connect and the Victron Cerbo GX is controlling the turbine via the generator start stop function.

What follows is a summary of our white paper with the same title. For the full white paper, see: Which solar charge controller: PWM or MPPT? in the White papers section of our site. 1. What they do The PWM controller is in essence a switch that connects a solar array to a battery. The [...]

This document provides a non-exhaustive list of recent projects in Africa that included Victron Energy products. It details over 30 projects across multiple sectors including health, education, commercial, industrial, and energy access. The projects range in size from small solar home systems to large mini-grids and involve the installation of Victron solar charge controllers, ...

Good day! Lately, I have been involved in several unattended Victron systems. Some of these being large scale containerised systems, such as the one shown above. And now that I think of it; as a system designer or installer you could consider almost all systems as unattended, as there will rarely be a trained Victron [...]

By Victron Energy The mountain bike events getting children into the great outdoors "Two years ago I was at a mountain bike race listening to the noise of a generator and struggling to hear the Public Address system; says Ed Jones from Off-Grid Power Systems.
