Renewable energy (or green energy) is energy from renewable natural resources that are replenished on a human timescale. The most widely used renewable energy types are solar energy, wind power, and hydropower. Bioenergy and geothermal power are also significant in some countries.

Large energy users like Amazon, Meta and Google have been major drivers for renewable projects, but prices and renegotiations are affecting these markets. In the first half of 2023, corporate purchases of clean energy landed at 6GW, compared to nearly 17 GW for all of 2022. As of the third quarter of 2023, solar PPA prices had risen 21% year ...
